When a patient has ...

- ✓ Painful, chronic or complicated non-healing wounds that have not improved in 3-4 weeks
- ✓ Neuropathic or diabetic ulcers
- ✓ Wounds involving a tendon, ligament, bone or joint
- ✓ Wounds in ischemic limbs
- ✓ Soft tissue damage caused by radiation
- ✓ Almost any wound, including arterial ulcer, burn, infected wound, pressure ulcer, surgical dehiscence, vascular wound, and venous stasis ulcer

If you're not sure we can help, call 866-686-4578 and ask.

Why the FHN wound center? We offer ...

- ✓ A wound care-certified, multi-specialty team
- ✓ 93.8% healing rate in 37 days of treatment; and 96% patient satisfaction
- ✓ Patient and wound-appropriate advanced dressings that are hard to provide in a private office setting
- ✓ Complex wound care that may require multiple adjunctive therapies or trained nursing staff
- ✓ Hyperbaric oxygen therapy that successfully treats diabetic, soft tissue radionecrosis, crush injuries, chronic osteomyelitis, compromised skin grafts and flaps, and acute peripheral arterial insufficiency
- ✓ An extension of your clinical practice; patients return to your care

What we do best:

- ✓ Assess for perfusion or pressure off-loading
- ✓ Control pain
- ✓ Optimize host factors and tissue growth
- ✓ Reduce edema
- ✓ Debride nonviable tissue
- ✓ Treat infection and inflammation
- ✓ Offer an optimum healing environment

Patients don't need a ...

- ✓ Primary physician within the FHN system
- ✓ Prior authorization — we'll coordinate, if needed
